2. Although it has been decreed that the NCAE does have control over official and private atomic investigations effected throughout Argentina, source stated that the NCAE does not have jurisdiction over the experimental station of San Carlos de Bariloche. The head of the Bariloche project is responsible only to President Peron either directly or through Col. Gonzalez. The NCAE, which is to act as an advisory board to the president, is planning to publish a monthly magazine on scientific matters which will probably be called Mundo Atomico. The first issue may appear in one or two months.
